Key Features

Stackable Design

Optimized shape for secure stacking and efficient storage.

Durable Construction

Strong HDPE construction for demanding industrial use.

Leak Resistant

Reliable sealing performance for safe liquid storage and transport.

Transport Ready

Designed for industrial logistics and global supply chains.

UN Ready Design

Manufactured with a design suitable for UN packaging applications, meeting common industry requirements for the safe transportation of liquids in accordance with applicable regulations.

Specific UN certification, performance levels and approval numbers can be provided upon request based on product configuration and intended use.
